

For decades, you've been told that no serious scientists dispute man-made global warming theory.

# an inconvenient truth

the crisis of global warming

AL GORE

Are those who make that claim being truthful?

Decide for yourself by reading the inconvenient facts below ...

## 1,000 International Scientists Strongly Dispute Al Gore's Global Warming Claims

*Chorus of skepticism continues to grow*

DEC. 8, 2010—More than 1,000 dissenting scientists from around the world have challenged man-caused global warming claims made by the United Nations Intergovernmental Panel on Climate Change and former vice president Al Gore. A United States Senate [report](#) on global warming contains the increasingly skeptical voices of many current and former UN IPCC scientists. This updated report includes an additional 300 climate researchers and other scientists who have changed sides in the global warming debate since the prior report was released in March 2009. But despite growing doubts, environmental alarmists continue to claim that the debate over global warming is no longer in dispute. As the sampling of comments below clearly show, someone is not telling the truth.

*"Anyone who claims that the debate is over has a fundamentally unscientific approach to one of the most momentous issues of our time."* -- Solar physicist Dr. Pal Brekke, senior advisor to the Norwegian Space Centre in Oslo. Brekke has published more than 40 peer-reviewed scientific articles on the sun and solar interaction with the Earth.

*"It is a blatant lie put forth in the media that makes it seem there is only a fringe of scientists who don't buy into (man-made) global warming."* -- U.S. Government Atmospheric Scientist Stanley B. Goldenberg of the Hurricane Research Division of NOAA.

*"The global warming scare is being used as a political tool to increase government control over American lives, incomes and decision making. It has no place in the Society's activities."* -- Award-Winning NASA Astronaut/Geologist and Moonwalker Jack Schmitt who flew on the Apollo 17 mission, and was formerly affiliated with the Norwegian Geological Survey and the U.S. Geological Survey.

*"I am a skeptic. Global warming has become a new religion."* -- Nobel Prize Winner for Physics, Ivar Giaever.

*"Many [scientists] are now searching for a way to back out quietly (from promoting warming fears), without having their careers ruined."* -- Atmospheric physicist James A. Peden, formerly of the Space Research and Coordination Center in Pittsburgh.

*"Earth has cooled since 1998 in defiance of the predictions by the UN-IPCC...The global temperature for 2007 was the coldest in a decade and the coldest of the millennium...which is why 'global warming' is now called 'climate change.'"* -- Climatologist Dr. Richard Keen of the Department of Atmospheric and Oceanic Sciences at the University of Colorado.

*"For how many years must the planet cool before we begin to understand that the planet is not warming? For how many years must cooling go on?"* -- Geologist Dr. David Gee the chairman of the science committee of the 2008 International Geological Congress who has authored 130 plus peer reviewed papers, and is currently at Uppsala University in Sweden.

*"Warming fears are 'the worst scientific scandal in history. When people come to know what the truth is, they will feel deceived by science and scientists.'" -- UN IPCC Japanese Scientist Dr. Kiminori Itoh, an award-winning PhD environmental physical chemist.*

*"I have yet to see credible proof of carbon dioxide driving climate change, yet alone man-made CO2 driving it. The atmospheric hot-spot is missing and the ice core data refute this. When will we collectively awake from this deceptive delusion?"* -- Dr. G LeBlanc Smith, a retired Principal Research Scientist with Australia's CSIRO.

*"The IPCC has actually become a closed circuit; it doesn't listen to others. It doesn't have open minds. I am really amazed that the Nobel Peace Prize has been given on scientifically incorrect conclusions by people who are not geologists."* -- Indian geologist Dr. Arun D. Ahluwalia at Punjab University and a board member of the UN-supported International Year of the Planet.

*"So far, real measurements give no ground for concern about a catastrophic future warming."* -- Scientist Dr. Jarl R. Ahlbeck, a chemical engineer and Abo Akademi University in Finland, author of 200 scientific publications and former Greenpeace member.

*"The models and forecasts of the UN IPCC 'are incorrect because they only are based on mathematical models and presented results at scenarios that do not include, for example, solar activity.'" -- Victor Manuel Velasco Herrera, a researcher at the Institute of Geophysics of the National Autonomous University of Mexico*

*"Even doubling or tripling the amount of carbon dioxide will virtually have little impact, as water vapour and water condensed on particles as clouds dominate the worldwide scene and always will."* -- Geoffrey G. Duffy, a professor in the Department of Chemical and Materials Engineering of the University of Auckland, NZ.

*"After reading [UN IPCC chairman] Pachauri's asinine comment [comparing skeptics to] Flat Earthers, it's hard to remain quiet."* -- Climate statistician Dr. William M. Briggs, who specializes in the statistics of forecast evaluation, serves on the American Meteorological Society's Probability and Statistics Committee and is an Associate Editor of Monthly Weather Review.

*"The Kyoto theorists have put the cart before the horse. It is global warming that triggers higher levels of carbon dioxide in the atmosphere, not the other way round...A large number of critical documents submitted at the 1995 U.N. conference in Madrid vanished without a trace. As a result, the discussion was one-sided and heavily biased, and the U.N. declared global warming to be a scientific fact,"* -- Andrei Kapitsa, a Russian geographer and Antarctic ice core researcher.

*"I am convinced that the current alarm over carbon dioxide is mistaken...Fears about man-made global warming are unwarranted and are not based on good science."* -- Award Winning Physicist Dr. Will Happer, Professor at the Department of Physics at Princeton University and Former Director of Energy Research at the Department of Energy, who has published over 200 scientific papers, and is a fellow of the American Physical Society, The American Association for the Advancement of Science, and the National Academy of Sciences.

*"Nature's regulatory instrument is water vapor: more carbon dioxide leads to less moisture in the air, keeping the overall GHG content in accord with the necessary balance conditions."* -- Prominent Hungarian Physicist and environmental researcher Dr. Miklós Zágoni reversed his view of man-made warming and is now a skeptic. Zágoni was once Hungary's most outspoken supporter of the Kyoto Protocol.

*"Gore prompted me to start delving into the science again and I quickly found myself solidly in the skeptic camp...Climate models can at best be useful for explaining climate changes after the fact."* -- Meteorologist Hajo Smit of Holland, who reversed his belief in man-made warming to become a skeptic, is a former member of the Dutch UN IPCC committee.

*"The quantity of CO2 we produce is insignificant in terms of the natural circulation between air, water and soil... I am doing a detailed assessment of the UN IPCC reports and the Summaries for Policy Makers, identifying the way in which the Summaries have distorted the science."* -- South African Nuclear Physicist and Chemical Engineer Dr. Philip Lloyd, a UN IPCC co-coordinating lead author who has authored over 150 refereed publications.

*"All those urging action to curb global warming need to take off the global cooling instead."* -- Geophysicist Dr. Phil Chapman, an astronomical engineer and former NASA astronaut, served as staff physicist at MIT (Massachusetts Institute of Technology)

*"Creating an ideology pegged to carbon dioxide is a dangerous social control, a pretext for major businesses and political battle. It became an ideology, which is concerning."* -- Environmental Scientist Professor Delgado Domingos of Portugal, the founder of the Numerical Weather Forecast group, has more than 150 published articles.

*"CO2 emissions make absolutely no difference one way or another....Every scientist knows this, but it doesn't pay to say so...Global warming, as a political vehicle, keeps Europeans in the driver's seat and developing nations walking barefoot."* -- Dr. Takeda Kunihiko, vice-chancellor of the Institute of Science and Technology Research at Chubu University in Japan.

*"The [global warming] scaremongering has its justification in the fact that it is something that generates funds."* --Award-winning Paleontologist Dr. Eduardo Tonni, of the Committee for Scientific Research in Buenos Aires and head of the Paleontology Department at the University of La Plata.

*"Whatever the weather, it's not being caused by global warming. If anything, the climate may be starting into a cooling period."* -- Atmospheric scientist Dr. Art V. Douglas, former Chair of the Atmospheric Sciences Department at Creighton University in Omaha, Nebraska, and is the author of numerous papers for peer-reviewed publications.

*"But there is no falsifiable scientific basis whatever to assert this warming is caused by human-produced greenhouse gases because current physical theory is too grossly inadequate to establish any cause at all."* -- Chemist Dr. Patrick Frank, author of more than 50 peer-reviewed articles.

After reading the comments above, does it appear that man-made global warming theory is "settled science," as Gore, Obama and the UN claim?

When Al Gore left public office after losing the 2000 presidential election, his net worth was estimated at \$1 million-to-\$2 million. After a decade of traveling the world in gas guzzling private jets collecting six-figure speaking fees and participating as an inside investor in taxpayer subsidized green energy projects, the world's No. 1 global warming alarmist has amassed a staggering net worth estimated at \$200 million. If energy cap-and-trade legislation is passed, Gore will be in line to become a *billionaire*. You can learn more about his opulent lifestyle by clicking [here](#).
